14. (Canceled)

15. (Original) A window assembly comprising a window frame, a glass block window panel supported by the window frame and comprising a plurality of non-specular glass blocks joined together, and a low-emissivity window panel assembly juxtaposed to the glass block window panel on an outer side of the glass block window panel, the low-emissivity window panel assembly being supported by the window frame.

16. (Original) The window assembly according to Claim 15 additionally comprising a desiccant material disposed between the glass block window panel and the low-emissivity window panel.

17. (Reinstated) The window assembly according to Claim 15 additionally comprising weather tight seals between the glass block window panel and the window frame and between the low-emissivity window panel assembly and the window frame.

Appl. No. : **10/645,984**
Filed : **August 22, 2003**

18. (Original) The window assembly according to Claim 15, wherein the window frame comprises a first frame assembly supporting the glass block window panel and an accessory pocket extending around a periphery of the first frame assembly, the window frame comprising a second frame assembly supporting the low-emissivity window panel assembly, the second frame assembly comprising a projection extending into the accessory pocket of the first frame assembly so as to support the second frame assembly relative to the first frame assembly.

19. (Original) The window assembly according to Claim 18, additionally comprising at least one of mechanical and chemical fasteners extending through the projection and into the accessory pocket.

20. (Original) The window assembly according to Claim 19, wherein the second frame assembly comprises a second accessory pocket opening towards an outer side of the second frame assembly.

21. (Reinstated) The window assembly according to Claim 15, wherein the frame is formed integrally with a wall.
